Country Plumbing

The day has come when the "Country Home" can be equipped with modern conveniences at a cost very little more than the "Home in the City."

The problems in most minds are how can we get water pressure and how can we take care of the sewerage, which are both easily solved when you know how.

If electric power is available you can have an automatic outfit, which is as sure a supply as the Toronto city water. If the power is not available it only means a hand pump and for the average house three times a week at the pump will deliver you hot and cold water to a complete bathroom.

As for the sewage; a septic tank, if properly installed, can be placed in any sort of soil and give perfect satisfaction. Remember the septic tank is sanitary.

If you are interested in this work drop me a card or telephone Parkdale 2931, and I will call and see you, no matter where you live, and give you an estimate.

I can refer you to satisfied customers.
